and the ventral deep nerve, and paravertebral
and epipharyngeal nerves, the species of *Peris*
Scutigerina are very similar to those of *Peris*
Scutigerina. A large number of species
of *Peris* have been described, and the
present paper is intended to give a
synopsis of the genus. The author
desires to thank his colleagues for
their valuable contributions to the
knowledge of the biology of *Peris*,
and especially Dr. J. G. Elliot, who
has given him permission to use
his notes on the biology of *Peris* in
particular.
